

Invasive Aquatic Weed Identification Training

This Training is Free

Where:

Hopkins Vineyard, Wine Bar
25 Hopkins Road, Warren CT

When:

Thursday June 28, 9-11 am

Curly Leaf Pondweed (*Potamogeton crispus*)

Join us and learn how to identify aquatic plants in Lake Waramaug and beyond. Special attention will be given to non-native invasive species, as early detection is our best defense when protecting the lake from nuisance weeds!

Workshop Leader:

George Knoecklein

George is the principal limnologist at Northeast Aquatic Research and has been working on Lake Waramaug for decades, and he will share his aquatic plant identification tricks and methods.

Please RSVP
