

# Meigs Point Nature Center and Hammonasset Beach

## Invertebrate “petting” tank and Beach Combing 101

**Thursday, Sept. 13, 2018**

Come to the shore with us and learn about the Long Island Sound’s most common invertebrates. A Connecticut biologist will give a talk about the ignoble critters we see on the beach. Inside the Nature Center, you will be able to handle live specimens and get “up close and personal” with them. Pack your lunch and beach chair, because after “school,” we’ll enjoy recess relaxing and enjoying the beautiful Hammonasset Beach State Park. On the way home, we make a stop for ice cream. Departure at 9:00 a.m.

Activity: Meigs Point Nature Center & Hammonasset Beach State Park
